At Somerville Secondary College, we realize that this isn't always an option. Students are permitted by DET to bring in a device they currently own, and we can do a configuration for WiFi access only.

If your family wish to bring in a 3rd party device and wish to have the Somerville SC Standard Operating Environment installed onto it, the device must meet these minimum specifications:

1. Windows-Based PC (for Apple Mac and Chromebooks, "best effort" WiFi and some software is available)
2. Intel Platform (preferably Core i5 and above for multimedia purposes, **ARM and AMD platforms ARE NOT fully supported** and is "best effort" only. This is due to hardware limitations outside of our control.
3. Minimum 4GB RAM (8GB preferred)
4. Minimum 120GB Solid State Drive or "SSD" (240GB and above preferred)
5. Device must be clear of user data, documents, pictures and music.
6. The SSC IT Department **IS NOT responsible** for keeping a recovery or factory image of **ANY** 3rd party device, unless the device is supplied to the IT department in **new/boxed condition**, ready for capture. **This is the responsibility of the owner.**

If the device has encryption such as BitLocker or FileVault enabled, SSC IT Staff WILL NOT work on the device.

Please forward any IT enquiries to sscit@somervillesc.vic.edu.au

Please Note: Models and Prices displayed are accurate as of June 2021, and may be subject to change as models are updated. Somerville Secondary College highly suggests adding any additional warranty and insurance options listed at purchase. Delivery times are an estimate, and may be shorter or longer due to Covid-19 affecting manufacturer supply.
